Features

Buyers features:

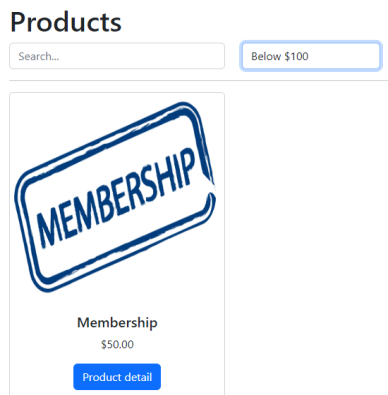

1. Search for products

Goal and use: A buyer can search for products

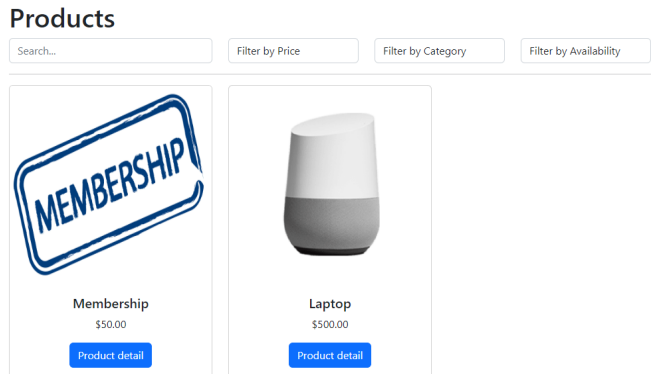

2. Filter products by price category

Goal & use: The buyer can see the cheapest to most expensive item or vice versa which helps them know which item is worth more than the other in order.

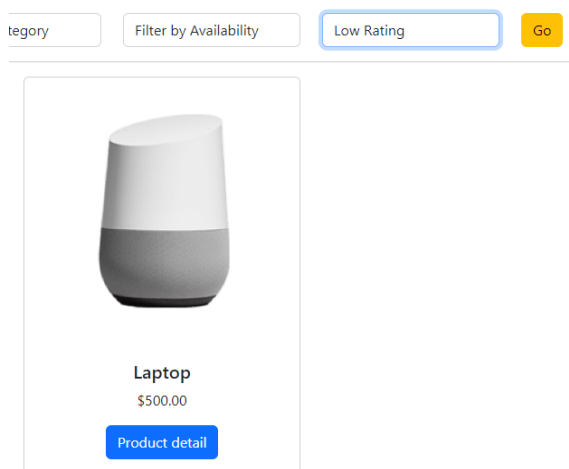

3. Filter products by availability

Goal & use: It makes it easier for buyers to not waste time looking for a product that is not even in stock or available to buy.

4. Filter products by rating

Goal & use: It can be useful for a buyer to be able to filter products by their ratings, so if they want to see first the lowest rated product and the best products last to see for example which product they would like to buy between one or another and see that ratings are better for one, then it is useful.

5. Filter product by category

Goal & use: If for example a buyer is looking for a bag specifically and sees many other items for sale like a laptop for example and wants to see every bag that is for sale then this feature is for sure beneficial for the buyer.

8. Remove item from the cart

Goal & use: The buyer might not want to purchase a certain item anymore for any reason, removing an item from the cart is then a must have.

Carts

Product	
	Iphone 10s11
	Delete

9. Edit item in cart

Goal & use: If the buyer Wants more or less of the same item when they originally wanted only 2 for example then this feature is needed for the buyer.

	Price	Qty	Tot
	\$200.00	<input type="text" value="1"/> <input type="button" value="Update"/>	\$200.00
Sub Total:			\$200.00

10. Purchase a subscription

Goal & use: The buyer can have an entire subscription to be able to get a 10% discount on all the items they purchase which is very useful for those who buy often.

Sellers features:

1: List items for sale

Goal & use: It is important for any seller to have a list of their items they put for sale to keep track of all the items they are selling as they might end up having an item that they no longer sell anymore so they would need to remove it.

Add new Product

[Go to product list](#)

Product Name		
<input type="text" value="Belt"/>		
Price	Brand	UPC
<input type="text" value="1"/>	<input type="text" value="Tom"/>	<input type="text" value="1001"/>
Stock	Category	Image
<input type="text" value="3"/>	<input type="text" value="Decor"/>	<input type="button" value="Choose File"/> <input type="button" value="No fi...osen"/>
Description		
<input type="text" value="Good looking belt"/>		
<input type="button" value="Submit"/> <input type="button" value="Reset"/>		

2: Remove/edit items

Goal & use: If a seller does not have an item anymore that is still showing up for buyers, or he has less of one item in stock, then removing or editing items is needed for the seller.

My Products

[Add new Product](#)

Image	Product Name	Price	In Stock	Brand	Edit	Delete	Reports
	Belt	1.00	3	Tom	Edit	Delete	0

3: Set inventory quantity on their products

Goal & use: A seller needs to set the amount of items he has in stock so that the buyer does not try to purchase an item that the seller does not have in stock anymore and it is important for business if an item is low on stock for the buyer to know as if an item they want is low on stock they are more likely to buy it so that they get it as soon as possible.

Stock

4: See their orders and filter them through date or price

Goal & use: It can be useful for the seller to sort and filter his orders by date or price, if he wants to get rid of an item that is more expensive first or if he sees an order that has been placed a few days ago and sees a more recent order, he would tell himself that he should deal with the older order before dealing with the more recent ones.

Seller Balance: \$1.00					
Orders		Filter By:	dd/mm/yyyy	Filter by Price	GO
Product		Price	Qty	Discount	Total
	Belt Cancel order Item shipped?	\$1.00	1	0	\$1

5: See the list of items they are selling

Goal & use: It is important for any seller to have a list they can view to keep track of their items they are selling.

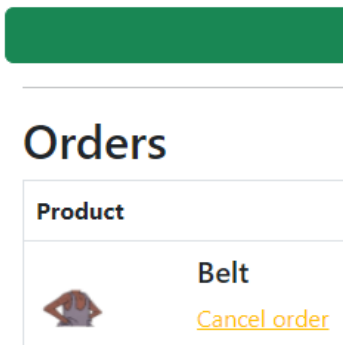

My Products

[Add new Product](#)

Image	Product Name	Price	In Stock	Brand	Edit	Delete	Reports
	Belt	1.00	3	Tom	Edit	Delete	0
	Chain	700.00	4	Gucci	Edit	Delete	0

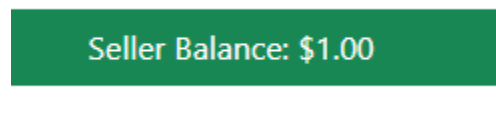

6: Cancel an order

Goal & use: If the seller runs out of items or mistakenly put the wrong amount he has in stock then canceling an order is a must have so that no problem occurs between them and the sellers.

7: See their total balance of sales:

Goal & use: It helps the seller see how much is he selling and if he is doing well for his business that way if they are not making enough from their sales and wants to see if the business is doing well then being able to see their total balance of sales is useful.

8: Mark an item as shipped and add a tracking number:

Goal & use: It will help both the seller and the buyer track the package and see if there might be any problem when the package is being delivered to the buyer and if there is any problem with the package, he can find a solution with the buyer.
